The Audio lines window displays 8 channels (Line 1 to Line 8). Each channel has a volume level indicator (a bar with colored segments) and a set of playback controls including play, stop, previous, next, and volume buttons. A 'Close' button is located at the bottom of the window.

The Filter window allows users to filter call logs based on date and time. It includes two calendar pickers for 'From date' and 'To date' (both set to September 2010), and two time pickers for 'From time' and 'To time'. Below these are input fields for 'Extension / Audio line' and 'Called number / CLIP', and checkboxes for 'Incoming calls', 'Outgoing calls', 'Internal calls', and 'Messages'. A 'Filter' button is at the bottom.

The Options dialog box is open, showing settings for recording. It has tabs for 'Options', 'Columns', 'Miscellaneous', 'Audio lines', and 'Lines settings'. The 'Options' tab is active, showing checkboxes for 'Autostart', 'Incoming call recording', 'Outgoing call recording', 'Internal call recording', 'Close application with password', 'Close application in "Tray Icons"', 'Start application in the "Tray Icons"', and 'Add recording time'. There are also input fields for 'IP352' (TCT port connection) and '127.0.0.1' (TCT IP Address connection). 'Set' and 'Cancel' buttons are at the bottom.
